SUMMARY

- Experienced front-end developer with expertise in **React, Angular, TypeScript**, and **RxJS**
- Built and maintained 10+ reusable React & Angular components for a SaaS app, reducing bugs by 40%.
- Driven by curiosity and a commitment to excellence in tackling challenging problems. Focused on delivering thoughtful, high-impact solutions while embracing continuous learning to contribute meaningfully to organizational goals.

WORK EXPERIENCE

Softel Solution Pvt. Ltd.

Noida

Software Developer

July 2025 – Present

- Developing and maintaining responsive web applications using React.js, Redux, and TypeScript, ensuring high performance and scalability.
- Implementing dynamic and reusable UI components aligned with design systems and brand guidelines.
- Integrating RESTful APIs and managing secure data handling between frontend and backend services.
- Collaborating with backend, QA, and design teams to deliver end-to-end solutions and ensure optimal user experience.
- Optimizing application performance through lazy loading, code splitting, and bundle optimization.
- Managing state, routing, and authentication flows using tools like Redux Toolkit, React Router, and JWT.

RenewBuy.com

Gurugram

Software Engineer

October 2022 – June 2025

- Contributed to the development of Renewbuy, an insurance brokerage platform offering services for purchasing and comparing life, auto, and health insurance, as well as loans and credit cards.
- Designed and implemented responsive websites, mobile applications, and landing pages, ensuring a seamless user experience from concept to deployment.
- Standardized all output with a new, responsive, mobile-first approach and strategy.
- Collaborated with UX/UI teams to assess and enhance the technical feasibility of designs, ensuring consistent, user-friendly interfaces.
- Developed interactive reports and data visualizations in graph format, delivering actionable insights as per business requirements.

PROJECTS

ValoQuest- Survey Portal

- **Tech Stack:** React.js, Redux Toolkit, RESTful APIs, JWT Authentication, React Router, Axios, Vite, CSS, HTML
- **Description:** Developed an interactive **survey creation and analytics platform** supporting both **enterprise** and **individual users** with role-based access control.
- **Key Contributions:**
 - Built **responsive and modular UI** in React with Redux Toolkit for efficient state management.
 - Implemented **JWT authentication** with enterprise, normal, and super admin user roles.
 - Designed a **three-mode survey builder** (AI-based, template-based, and manual creation).
 - Integrated **survey publishing, sharing, and analytics** with configurable expiry settings.
 - Enhanced performance through **code splitting** and optimized API integration.

ValoDSS – AI-Powered RAG & NL2Query Platform

- **Tech Stack:** React.js, RESTful APIs, JWT Authentication, RAG Architecture, NL2Query, Axios, Vite, CSS, HTML
- **Description:** Built an intelligent decision-support system combining RAG-based document QA and natural language-to-SQL querying, enabling users to interact with both unstructured documents and structured databases through a unified interface.
- **Key Contributions:**
 - Developed an end-to-end UI in React with Redux Toolkit for efficient state and query management.
 - Implemented a **RAG-based chatbot** allowing users to ask general questions, upload documents, and retrieve document-specific answers with managed chat history.
 - Built an **NL2Query module** enabling users to connect to databases, view schema, and ask natural

language questions automatically converted into SQL queries with tabular results.

- Integrated secure **JWT authentication** and role-based access for controlled feature access.
- Optimized application performance using **code splitting, lazy loading, and efficient API integration**.
- Ensured a seamless user experience with clean UI components, error handling, loading states, and persistent session management.

Consumer Dashboard

- **Tech Stack:** Angular, TypeScript, RxJS, HTML5, SCSS, RESTful APIs, Git
- **Description:** Contributed to **RenewBuy.com**, a direct-to-consumer insurance platform simplifying the **health and life insurance** purchase process.
- **Key Contributions:**
 - Developed a **responsive Angular frontend** for plan comparison and premium calculation.
 - Built **reusable UI components and services** for scalable and consistent design.
 - Optimized **frontend architecture** using lazy loading and modular structure.
 - Collaborated with UX/UI teams to improve user experience and streamline workflows.

EDUCATION

Krishna Engineering College, Ghaziabad

Bachelor of Technology – Computer Science and Engineering; GPA: 7.55

Uttar Pradesh, India

August 2019 – July 2023

SKILLS SUMMARY

- **Languages:** JavaScript, Typescript , HTML, CSS
- **Frameworks:** REACT JS , ANGULAR
- **Tools:** Postman, Bootstrap, Gitlab
- **Platforms:** JIRA, Windows/Linux
